

SETEX and Navis TubeTex have teamed up to improve textile dyeing and finishing with their integrated solutions.

As the new SETEX agent in Canada, Honduras and the United States, Navis TubeTex can offer textile manufacturers comprehensive, integrated solutions to enhance efficiency, streamline dyeing and finishing processes, and ensure accurate, consistent quality, resulting in sustainable cost savings.

"The combination of SETEX's advanced automation technology and Navis TubeTex's industry expertise will drive efficiency and excellence in textile processing " said Oliver Schermuly, owner of SETEX.

"With SETEX's manufacturing operations management software and controls for textile machinery, we have the opportunity to offer a proven combination of smart applications, systems and components, empower customers with enhanced efficiency, quality, cost savings, data insights, sustainability, and a competitive edge in textile manufacturing. SETEX's camera measurement technology complements our integrated workflow seamlessly" said Will Motchar, President and CEO of Navis TubeTex.

Press Release: SETEX and Navis TubeTex have teamed up

About SETEX

SETEX helps machine builders and textile finishers to realize production efficiently and sustainably.

As a one-stop supplier of manufacturing operations management software and controls for textile machinery, SETEX offers a unique combination of smart applications and IIoT technology for sustainable production efficiency.

The product portfolio is rounded off by a range of sensors and camera measurement technology that are perfectly matched to the integrated workflow.

Being family-owned and operated, SETEX stands for long-life quality, long-term availability and sustainable innovation. With R&D facilities in Germany and representatives in 65 countries, we are a full-service provider for consulting, sales, upgrading and modernization, remote and on-site service.
